APPLICATION NO.	FILING DATE	FIRST NAMED INVENTOR	ATTORNEY DOCKET NO.	CONFIRMATION NO.
09/767,150	01/23/2001	Stephen Guy Routliffe	10596-US	1398
23553	7590	09/10/2004	EXAMINER	
			WAHBA, ANDREW W	
		ART UNIT		PAPER NUMBER
		2661		
DATE MAILED: 09/10/2004				

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)	
	09/767,150	ROUTLIFFE, STEPHEN GUY	
	Examiner	Art Unit	
	Andrew W Wahba	2661	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 23 January 2001.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1-16 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 1-10, 14, 15 and 16 is/are rejected.
- 7) Claim(s) 11-13 is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on 29 June 2001 is/are: a) accepted or b) objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) All b) Some * c) None of:
1. Certified copies of the priority documents have been received.
2. Certified copies of the priority documents have been received in Application No. _____.
3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) Notice of References Cited (PTO-892)
- 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date 01/23/2001.
- 4) Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) Notice of Informal Patent Application (PTO-152)
- 6) Other: _____.

DETAILED ACTION

Claim Objections

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 6 (second occurrence) -15 have been renumbered 7-16.

Specification

2. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2661

4. Claim 2-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With regard to claim 2-9, the limitations of claims dependent on claim 1 should refer to a specific step claimed in claim 1, as claim 1 is a method claim. For example, in claim 2, the applicant claims "a pointer table stores the location of said data structures in memory" (lines 1 and 2). It is not clear whether this limitation refers to the step of creating a template, storing said template, or creating cells. The remaining claims 3-9 have similar problems that require correction.

With regard to claim 3, it is not clear whether the claimed "virtual channel" (line 2) is related to the cells created in claim 1.

With regard to claim 7, the limitations resulting from the "DBCES" (line 1) service are not clear. The applicant refers to a DBCES service (line 1) and a DBCES cell template (lines 2-3). Please refer to the area(s) of the Specification where these terms are explained.

With regard to claim 8, the limitations resulting from the "SDT DBCES" (lines 1-2) service are not clear. The applicant refers to a DBCES service (line 2) and a DBCES data structure (lines 2-3). Please refer to the area(s) of the Specification where these terms are explained. Also, with regard to claim 8, it is not clear whether claim 8 depends from claim 6 or claim 7 due to claim renumbering. Accordingly, it is difficult to determine the intended claim limitations.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1, 6, 10-11, 15 and 16 are rejected under 35 U.S.C. 102(e) as being anticipated by Saito et al (US Patent 6,198,742). Saito et al discloses an ATM switching system.

With regard to claims 1, 10 and 16, Saito et al discloses a cell template (template) of a network management cell that is stored in cell buffer 40 (storing the template / memory storing a template). When generating the cell (creating cells) the corresponding template is read and processed (column 4, lines 4-12). The cell buffer 40 is coupled to either an input processing portion 11 and an output processing portion 12 as illustrated in Fig 1 or generation/insertion portion 13 as illustrated in Fig 4. Disclosed elements 11, 12, 13 retrieve (retrieving) templates and the output processing portion (segmentation unit) creates (creating) cells (column 5, lines 13-19). The buffer 40 accumulates templates (creating a template) of ATM cells (ATM cells) to be processed (column 3, lines 54-56).

With regard to claims 6, 11 and 15, the buffer 40 (memory) is coupled to a generation/insertion processing portion 13 (microprocessing / central processing unit) as illustrated in Fig 4 (column 5, lines 16-19).

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Saito et al (US Patent 6,198,742).

With regard to claim 9, Saito et al does not expressly disclose the use of templates for the generation of UDT, SDT, or DSS cells.

Saito et al, however, discloses use of a cell template for different cell types (column 4, lines 8-9).

The suggestion that a cell template may be used for different cell types provides sufficient motivation to apply templates for the generation of UDT, SDT, or DSS cells. At the time the invention was made, therefore, it would have been obvious to one of ordinary skill in the art to which the invention pertains to employ templates for the generation of UDT, SDT, or DSS cells to obtain the invention as specified in claim 8.

Art Unit: 2661

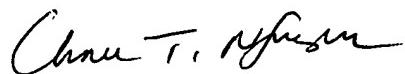

Allowable Subject Matter

9. Claims 12-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew W Wahba whose telephone number is (571) 272-3081. The examiner can normally be reached on M-F 8:30-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ken Vanderpuye can be reached on (571) 272-3078. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
